

Lena is one of the most popular students in her school's media club because she regularly creates short videos about technology and digital safety. Recently, she prepared a presentation about the advantages and disadvantages of social media platforms. During the presentation, Lena explained that digital tools make communication faster and easier, but she also warned students about the dangers of excessive screen time and sharing personal information online irresponsibly. While some students believed social media mainly has positive effects, others argued that it reduces face-to-face interaction and concentration. At the end of the session, Lena encouraged everyone to use technology consciously instead of depending on it excessively.

---

 SORU 1
